## FEDERAL LEGISLATION

In late November, pro-life leaders met with top Trump staff to outline a 5-point agenda. They asked for the following going forward: only sign budgets that defund Planned Parenthood, formalize the 'Protect Life rule' (*LN Jul/Aug 2018, p.3*), nominate more pro-life Judges, defund fetal tissue research, and defund sex-ed done by abortion providers. (*cnsnews.com*, Nov. 29) It's not clear what bills would be pushed in a lame-duck session, but as of Dec. 4, 2018, a PP defund is said to be off the table.

When the 116<sup>th</sup> Congress convenes on January 3, 2019, Democrats will have about 18 seats over the 218 needed for a House majority. This is a gain of approximately 40 seats. The Republican Senate majority is 3. Several Republican House members in California who led by 10% on election night lost in the final tally. Outgoing Speaker Ryan said, "We were only down 26 seats the night of the election and 3 weeks later, we lost basically every California race." House and Senate bills will get new numbers in the new Congress, even if they contain the same wording.

In October, Indiana asked the Supreme Court to overrule two lower Courts and allow State law **HEA 1337** to take effect. It bans abortions for Down Syndrome, genetic defects, or non-lethal deformity. Also, fetal remains must be properly buried. Nineteen other State Attorney's General back Indiana's request. The Supreme Court has decided **not** to hear the cases of *Gee v. Planned Parenthood Gulf Coast* and *Andersen v. Planned Parenthood of Kansas & mid-Missouri* (See: *LN Dec. 2018, p.3*)

The finalized exemption from the HHS abortifacient/sterilization/contraceptive mandate takes effect in early January. Individuals with sincerely held religious beliefs or non-religious moral convictions, nonprofit organizations, and small businesses are exempt. Publicly-traded businesses are not exempt. Mark Rienzi, Attorney for the *Little Sisters*, said these rules should help end the cases against the *Sisters* still being pursued by Attorney's General in California and Pennsylvania.

The Center for Medicare & Medicaid Services has proposed a rule that insurance issuers must "determine the amount of, and collect, from each enrollee, a 'separate payment' for an amount equal to the actuarial value of the coverage for abortions for which public funding is prohibited, which must be no less than \$1 per enrollee per month." Marjorie Dannenfelser, Susan B. Anthony List president, said this rule is "a step in the right direction." She stated Obama-era regulations violated the statute which mandated that the surcharge be collected separately. She noted that people have "unwittingly purchased plans without knowing about the hidden abortion surcharge."

The Centers for Disease Control announced that in 2015, US abortions were at their lowest level (638,169) since *Roe v Wade*. Five deaths were reported, all from legal abortion. Despite stories touting more contraception for the drop, Dr. Michael New said the key factor was that, since 1980 fewer unintended pregnancies have ended in abortion. The (pro-abortion) Abortion Care Network noted private abortion facilities are closing at an increasing rate - 60% of the nations' abortions and 94% of "later term" abortions happen in private 'clinics.'

**ACTION ITEM-** Participate in the March for Life in Washington, DC on January 18th, or support & pray for those who go. If you go to Washington, you can be a Lobbyist for a day.

## NEW YORK STATE LEGISLATION

The 2019 NYS Senate will consist of 23 Republicans and 40 Democrats, including Simcha Felder, who also ran on the Republican line. Four Long Island Senate seats flipped from Republican to Democrat. Even if these seats had not changed, Democrats would still be in the majority. The NYS Assembly increased its overwhelming majority. It will be extremely difficult to prevent the passage of Democrat high-priority items. When the NYS Legislature reconvenes in January, Abortion Expansion will likely be pushed through now that Democrats are in complete control of state government. NYS Senator Andrea Stewart-Cousins, the new Senate majority leader, co-sponsored the Reproductive Health Act. We may be able to peel off some allies on the euthanasia/assisted suicide issue. We don't always get the right people in office, but we can bring pressure on the wrong people to do the right thing from time to time. Prayer helps.

**Note for our readers:** Fidelis Care was sold in August. 2019 Fidelis policies will now cover abortions and abortifacient drugs. According to the Family Research Council/Charlotte Lozier Institute, Obama-Care insurance plans that cover abortions are up 23% for 2019. Please see the website, [obamacareabortion.com](http://obamacareabortion.com). If you click on NY, you will see that 100% of the policies offered on the NYS of Health Marketplace for 2019 cover elective abortion. In addition, there are no Multi-State Plans available in NY. (In 2017 there were 8 MSPs offered in NY which all excluded elective abortion.)

## HEALTH & SCIENCE

### FETAL TISSUE RESEARCH

Two house subcommittees were scheduled to hold a hearing December 13<sup>th</sup> regarding ethical alternatives to fetal tissue research. The Health and Human Services Department is reviewing contracts involving federal funds used for research involving fetal tissue harvested from elective abortions. In 2015, David Daleiden, through the Center for Medical Progress, released undercover videos which revealed representatives of abortion facilities and related companies discussing the sale of baby body parts. Those videos led to congressional investigations which resulted in criminal referrals of procurement companies and abortion providers. These violations involved profiting from the sale of tissue, infringing on patient privacy and modifying surgical abortion procedures to obtain certain tissues.

David Prentice and Tara Sander Lee, scholars from the Charlotte Lozier Institute, spoke at the Heritage Foundation's "Fetal Tissue Research: Antiquated and Unethical" event in December. Prentice and Lee noted that in 1988 President Reagan issued a moratorium on the use of federal funds for research using fetal tissue obtained through abortions. President Clinton lifted that moratorium in 1993. In 1993, Congress then passed legislation on transplantation research using fetal tissue which included provisions and guidelines for informed consent and payments for procuring and transferring the tissue.

Those who support fetal tissue research use the example of the polio vaccine. However, these proponents neglect to mention that advancements were made using 'historic fetal cell lines.' These cell lines do not rely on current abortions. The original polio vaccines used monkey tissue and fetal cell lines. Currently, there are no vaccines made with fresh fetal tissue. In addition, transplanting fetal tissue to treat diseases such as anemia, diabetes and Parkinson's has been unsuccessful. The transplantation of fetal stem cells has also been unsuccessful.

Prentice and Lee noted that fetal tissue research has become a \$100 million industry with very little oversight. For example, a consent form from a Planned Parenthood facility to procure tissue from an aborted baby claimed that fetal tissue research led to a "cure for such diseases as diabetes, Parkinson's, Alzheimer's, cancer, and AIDS. Prentice and Lee said this blatantly false statement should never have been printed or used to influence a woman's decision regarding an abortion. Researchers are currently

targeting the use of fetal tissue for research regarding Zika, respiratory distress syndrome in infants, Down's and HIV/tuberculosis.

Lee said Advanced Bioscience Resources (ABR), based out of California, is the "oldest continuously operating wholesaler of aborted fetal body parts in the United States. A report in September from the Center for Medical Progress concluded that Advanced Bioscience Resources has played middle-man for tens of millions of dollars in transactions over freshly aborted baby body parts since its founding in 1989." ABR records indicated that in June 2014 they paid \$60 for a 20-week-old aborted fetus, and sold the baby's organs and tissues, including brain, eyes, liver, thymus and lungs to five researchers and received over \$2,000. ABR considered that a 'service fee'. They also charged for shipping, screening and freezing. Lee stated there "was much more money that was transferred in addition to just that service fee that they claim."

Lee continued, "So the real question is, is this a service fee or was there a profit being made? [ABR] determined prices that they wanted to charge depending on how old the fetus was. If the fetus was in the second trimester, they would charge like \$200 back in 2010. But then in 2015, they upped that to \$340. Whereas for a first trimester fetus, they were charging \$420 in 2010, but then that increased to \$550 in 2015. If this is truly just a simple service fee, why did those numbers increase over the years?"

There are ethical alternatives to tissue derived from abortions. These sources include the placenta, umbilical cord, amniotic fluid, discarded surgical tissue, and postmortem tissue. Prentice and Lee highlighted the use of discarded surgical tissue to identify "key mechanisms involved in developing human pulmonary valves." They also brought to light the fact that a "small biopsy of skin may be used to grow cells that can imitate and resemble embryonic stem cells. Induced pluripotent stem cells then can be programmed to generate an 'organoid' that can resemble a brain, lung, kidney, or liver." Adult stem cells have been used to treat over 1.5 million people worldwide for cancer, stroke, spinal cord injury, and other diseases and conditions.

There have been so many scientific advances using ethical alternatives to aborted fetal tissue. HHS should issue a moratorium on federal funding for aborted fetal tissue research and promote ethical alternatives. As Lee noted, ethics must be our priority – "Using ethical sources is absolutely always the right decision."

**Planned Parenthood**

At the beginning of 2018, **Planned Parenthood** had 166 facilities that committed surgical abortions and 190 facilities that did medication abortions but not surgical. The number of medication-only Planned Parenthood abortion centers has been growing at a rapid rate over the last decade. Whether through surgical abortions, medication abortions, or the abortifacient actions of numerous Planned Parenthood birth control products, preborn babies are dying as a result of activity at Planned Parenthood facilities.

### *Fri., Jan. 18, 2019 Annual March for Life in Washington DC*

#### **March For Life 2019**

**Participants - Provide Your Own Press Coverage:** Tired of just complaining about no March For Life coverage in the major local newspapers? Bring March For Life coverage to your home town through your local weekly newspaper. Weeklies like to cover what local residents are doing - just a picture and a short caption is all it takes.

**Suggestion:** Take a photo of your pro-life group against the MFL crowd. Write a brief caption, such as: Pictured are members of ABC parish/youth group at the March For Life in Washington D.C. on January 18, 2019. These pro-life advocates joined hundreds of thousands at this event calling for an end to abortion and return to respect for the life of unborn babies. Mail or e-mail your photo/caption to a local paper (e.g. LI Herald or Anton Community Newspapers). Bring pro-life news to your neighbors!

#### **Youth Attending March for Life - Feedback Wanted!**

If you are 10-16 years old and attend the 2019 March for Life in D.C., the LI Coalition for Life wants to hear about your experience. Please tell us in about 25 words what you thought of the March for Life. We hope to publish some of your feedback in Life News. Please e-mail or mail your feedback to us at: [info@prolifeLI.org](mailto:info@prolifeLI.org) or LICL, PO Box 247, Old Bethpage NY 11804 - to be received no later than 2/4/19. Include your Name, Age, Town, and who you went to the MFL with (e.g. school, parish, family). Thank you for attending the MFL and sharing your thoughts with us.
